Rikard Hallberg

rikardhallberg.com | github.com/rikhall1515

Summary

Cross-functional full-stack developer with a strong focus on delivering functionality to the end customer and meeting both culture and process standards within companies.

Experience

Vizeer – AI sales automation, Frontend/Design
oct. 2023 – feb. 2024

- Designed the entire application using Figma in the span of 1 month. This includes both the landing page, dashboard, onboarding, and login/register.
- Interfaced with the dev team to meet project deadlines. Helped the main Frontend developer code the UI.

Klardeal – smarter business agreements, Full-stack
oct. 2023 – dec. 2023

- Successfully deployed a platform that facilitates deals from large companies to small/mid-sized companies. Two (out of 5) deals were with multimillion-dollar companies.
- Project deadline was 1.5~ months, garnering a total of 25 paying customers. Custom design took only 2 weeks, implementation took another 6. Technologies: Qwik.js, TypeScript, Cloudflare pages.

Project course in software development, Westermo, Full-stack
nov. 2021 – jan. 2022

- Built risk integration software as a web app with a team of 6. Took responsibility for a majority of the Frontend, and the docker containers. Technologies: Vue.js, TypeScript, Express, Docker, MySQL, Sequelize ORM.
- Handled talks with Westermo and set up 5 meetings. We set goals, due dates, and software updates in those meetings.
